Fullerton, CA | (714) 659-4517 | Email: codinhunkim@gmail.com | [GitHub](#) | [LinkedIn](#)

Technical Skill

Strong: JavaScript, ECMAScript6, PHP, Bootstrap, HTML, CSS, React.js, Web APIs/JSON

Experienced: MySQL, Node.js, Redux, PHP, jQuery, OOP and MVC paradigms

Developed Application

Super Smash Stats

- This website dynamically displays tournament information, match history, and individual player profiles for professional-level Super Smash Bro's players.
- Orchestrated the front-end of the website to implement ReactJS and Bootstrap 4
- Utilized ReactJS fundamentals, such as: recycling and modular usage of components, manipulating and handling state within an application, and directing objects from axios calls.

How Drunk Are You?

- Implemented Ajax calls to various public API libraries to dynamically populate an application with random images; which the user would then have to match correctly to complete the game.
- Used three different API libraries to create a fun web-application that gauges how drunk the user is by implementing jQuery and JavaScript for its logic.
- The API libraries that were used were Unsplash, Google Maps, BreweryDB, and Youtube.

Starversi

- Recreated the classic game of Othello/Reversi in respect to Star Wars.
- Allows the user to pick between the Dark or Light side of the Force; Ai is given the remaining choice. The Dark Side always goes first.
- Enabled dynamic board creation depending on user's choice using jQuery; the logic and win conditions were determined entirely using OOP paradigm and JavaScript.

Professional Experience

4STOCK - Marketing

2017

- Created a startup company that focused on creating a clothing line that tailored to avid gamers and lovers of the iconic video game: Super Smash Bro's Melee.
- Contacted owners of different venues and hosts of gaming tournaments to sell and distribute 4STOCK's clothing line.

The Vault - Sales Associate

2016-2017

- Provided customer service and knowledge about trending streetwear brands to ensure customer satisfaction.
- Trained new employees to ensure a good and safe working environment.

Education

Learning Fuze

2017

University of Illinois: Urbana Champaign

2013 - 2015
