**Strong:** Javascript, ReactJS, Redux, jQuery, HTML, CSS

**Experienced:** NodeJS, PHP, MySQL

## Developed Application

---

### Super Smash Stats [github](#) | [live](#)

- This website, created by five junior-level developers, dynamically displays data for a Super Smash Bros video game; using **ReactJS**, **NodeJS**, and **MySQL**.
- Served as the main front-end developer, responsible for creating reusable components.
- Utilized **ReactJS** fundamentals, such as: recycling and modular usage of components, manipulating and handling state within an application, and directing objects from **axios** calls.

### How Drunk Are You? [github](#) | [live](#)

- Used three explicitly different **API** libraries to create a fun web-application that gauges how drunk the user is by implementing **jQuery** and **Javascript** for its logic.
- Created **Ajax** methods to public **API** libraries, that dynamically populated the webpage with random photos that users could click; ultimately determining how intoxicated a user is.
- The **API** libraries that were used were **Unsplash**, **Google Maps**, **BreweryDB**, and **Youtube**.
